

# Agile Software Development

- An overview to Omni-  
Channel product  
development by Shobhika

A group of people are gathered around a table in a meeting. One person is pointing at a document with a pen. There are several documents with charts and graphs on the table. A laptop is open on the right side of the table. A green mug is also visible. The background is slightly blurred, showing more people and office furniture.

# Prerequisites for this session

- Full Stack DevOps Project Internship
- SQL, NoSQL, UML Diagrams
- What is Business Operations?
- Demo project on Java Full Stack Development

# Prerequisites for the Web Development

**Software Engineering Principles:** Analysis, Design, Coding, Testing, and Maintenance

Basic Knowledge of **Website Development** using HTML, CSS, Java, and SQL to learn the code flow from front end to the back end

Deep understanding of exceptions and errors for **Troubleshooting and Debugging**

Working knowledge of Notepad++, Sublime, Atom etc.,

Google Search (keyword search changes from time to time)

A word cloud visualization centered around the word "BROWSER". The word "BROWSER" is the largest and most prominent, located at the bottom center. Above it, the words "WEB" and "ONE" are large and positioned to the left and right respectively. To the right of "ONE" is the word "FILE", and below "FILE" is "FUNCTIONALITY". Other significant words include "BASIC", "OPTIONS", "FORMATTED", "DOMAIN", "EXTENSION", "MOZILLA", "HOWEVER", "COMBINATIONS", "EXCUSED", "FREEDOM", "SETTINGS", "FUNCTIONALITIES", "WANT", "ADR", "EXAMPLE", "ALTERNATIVELY", "SPECIFY", "AVAILABLE", "PREFIXES", "LOADED", "WINDOW", "DIFFERENT", "AMONG", "REASON", "QUICKOBJECTS", "OPERATING", "EDIT", "PLATFORM", "CUSTOMIZABLE", "EXTEND", "USING", "OFFER", "THINKING", "SUPERIOR", "CLICKING", "HISTORY", "MAKE", "WELL", "THINGS", "STANDARD", "COMPLETION", "AVERAGE", "SUPPORTS", "IMPROVE", "PLUG", "INTERNET", "THREADED", "EX", "BOOKMARKS", "JAV", "BROWSERS", "SIMULTANEOUSLY", "MULTI", "EXTERNAL", "KEY", "WAYS", "SEVERAL", "NEW", "HTM", "PROVE", "ENJOYABLE", "HOME", "USER", "CHANGING", "LOOKS", "PUT", "GREAT", "SIMPLY", "APPEARANCE", "RICH", "TERMS", "OPERATION", "RUNS", "SEAMLESS", "OPERATES", "CHANGE", "INS", "ADD", "FEATURES", "CODE", "URL", "COMPONENTS", "XML", "PAGES", "UNDoubtedly", "ADVANCED", "DIFFERENT", "WINDOW", "LOADED", "SUPPORT", "MEANS", "BAR", "INTERFACE", "FULLY", "OPT", "ADDRESS", "LOOKING", "SESSION", "BOUNDARIES", "BROWSING", "OTHERENABLED", "BARS", "VISUAL", "OPER", "EITHER", "PROXY", "ENHANCED", "USUALLY", "OPTION", "USED", "EASE", "WAY", "EVEN", "POSTFIXES", "SUPPORTED", "ADDED", "FOUND", "LINES", "AVERAGE", "SUPPORTS", "IMPROVE", "PLUG", "INTERNET", "THREADED", "EX", "BOOKMARKS", "JAV", "BROWSERS", "SIMULTANEOUSLY", "MULTI", "EXTERNAL", "KEY", "WAYS", "SEVERAL", "NEW", "HTM", "PROVE", "ENJOYABLE", "HOME", "USER", "CHANGING", "LOOKS", "PUT", "GREAT", "SIMPLY", "APPEARANCE", "RICH", "TERMS", "OPERATION", "RUNS", "SEAMLESS", "OPERATES", "CHANGE", "INS", "ADD", "FEATURES", "CODE", "URL", "COMPONENTS", "XML", "PAGES", "UNDoubtedly", "ADVANCED", "DIFFERENT", "WINDOW", "LOADED", "SUPPORT", "MEANS", "BAR", "INTERFACE", "FULLY", "OPT", "ADDRESS", "LOOKING", "SESSION", "BOUNDARIES", "BROWSING", "OTHERENABLED", "BARS", "VISUAL", "OPER", "EITHER", "PROXY", "ENHANCED", "USUALLY", "OPTION", "USED".

# Work Breakdown Structure

# Prerequisites for Software Delivery

- ***Agile Software Development***: Analysis, Design, Coding, Testing, Scrum, Backlog, Burndown chart
- Basic Knowledge of business operations and use cases
- Requires Technical skillset ***Java, J2EE, Java Frameworks, SQL***
- Basic Knowledge of the DevOps tools such as ***JIRA, Confluence, Gitlab, Jenkins, Sonar***
- Hands-on on the Logging tool: ***Elasticsearch***
- Hands-on on the API Testing tool: ***Postman or Insomnia***
- Technical Architecture and Technical Stack
- Scope of controller projects (***Endpoint call, Swagger contracts, api\_response***)
- Work in Collaboration with other teams such as Frontend, Backend, Infrastructure, and other teams

# Configurations

- Endpoint calls
- Design Patterns in Monolithic & Microservices Projects
- Configuration files such as application.properties and pom.xml
- Basic SQL commands
- Referential Integrity

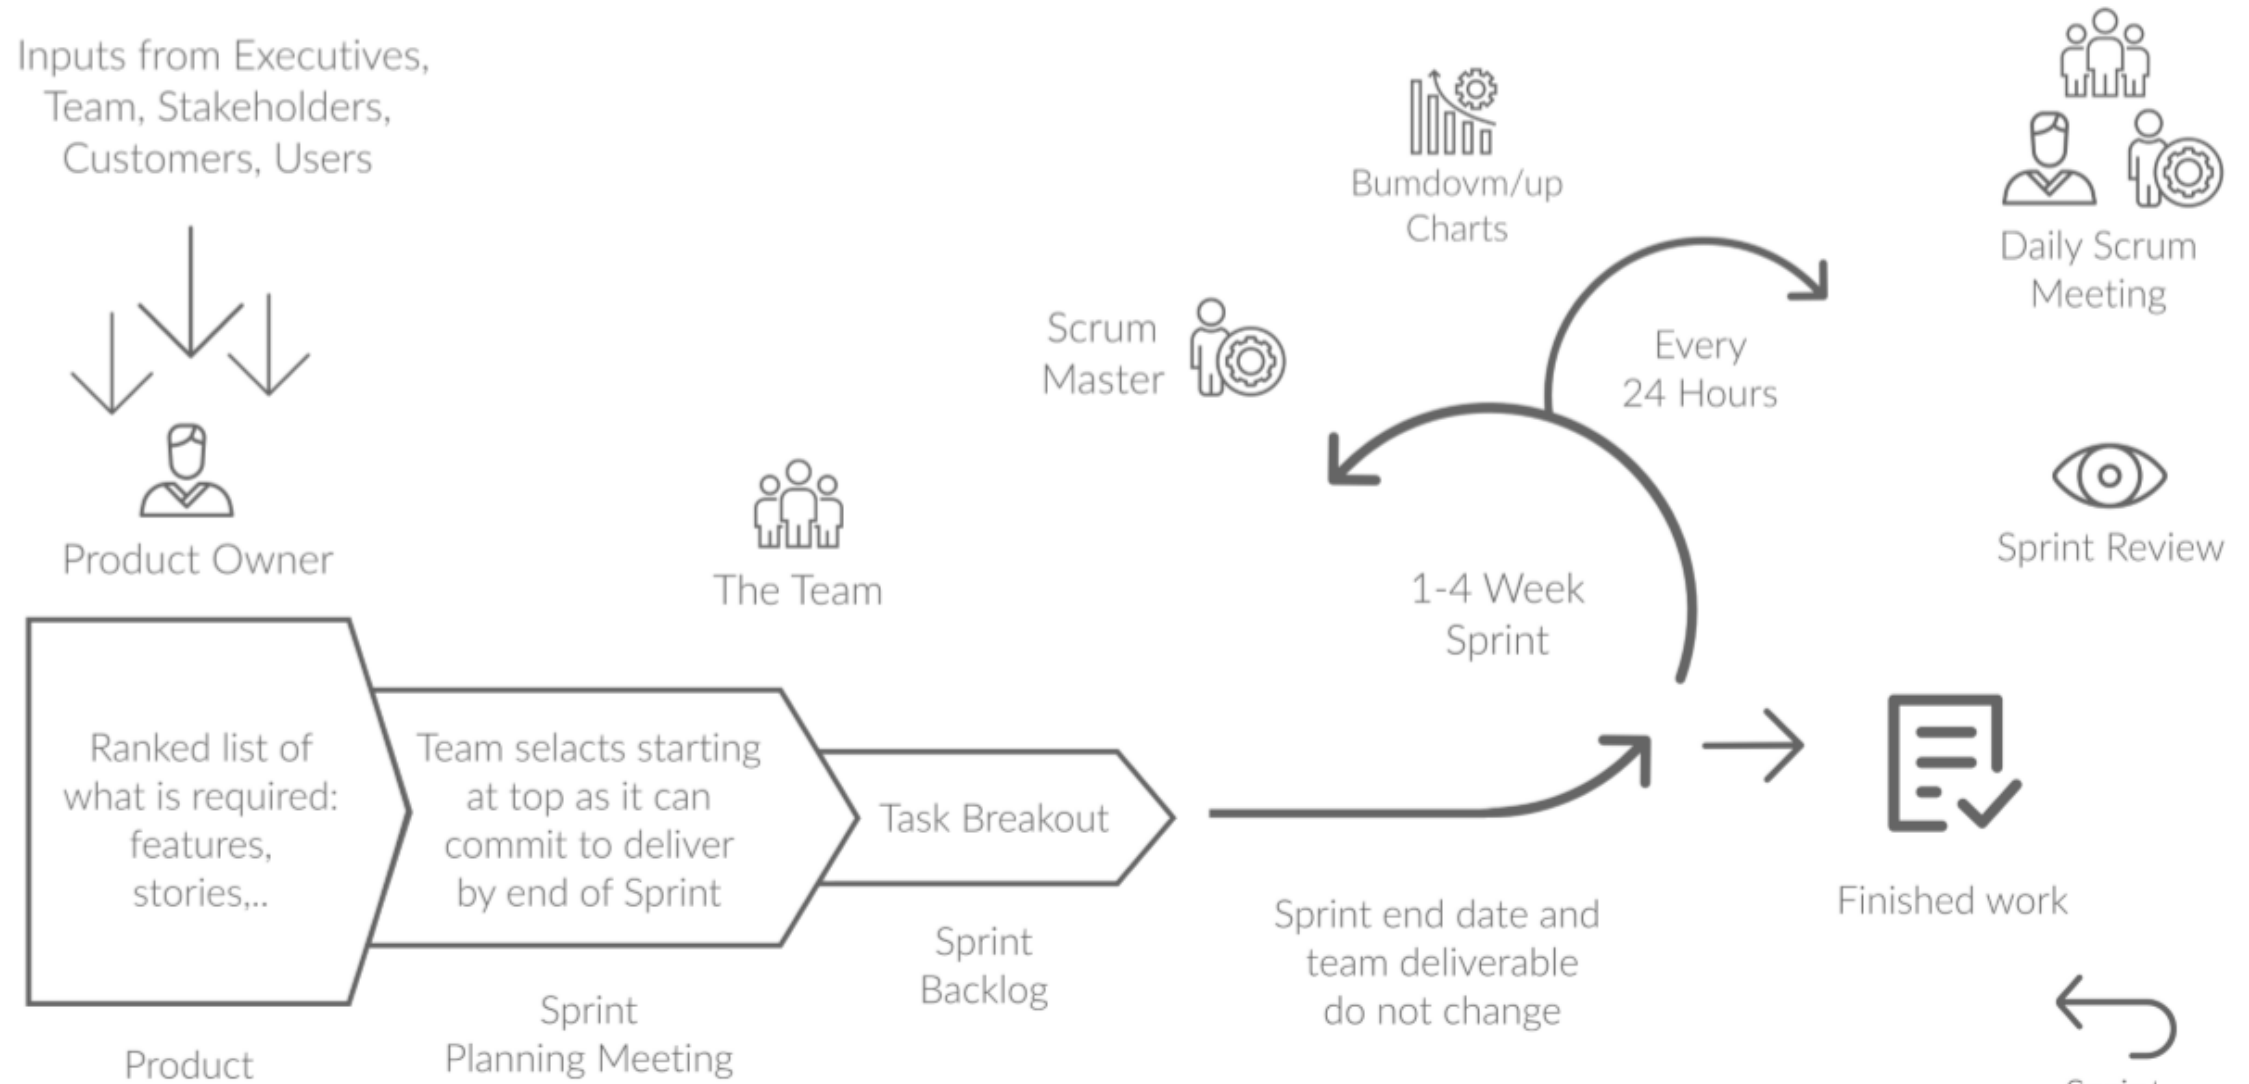

# Typical Agile Delivery

- Estimated Time of Arrival (ETA)
- Epic, Sprint, Agile Program
- Story estimation points
- If needed, get an approval from the Governance team
- Testing Environments (dev, qa, stg, prod)
- Launch in Markets
- Other frequently used acronyms (DIT, SIT, UAT)
- Central Repository such as GitHub
- CI/CD Pipeline

# THE AGILE: SCRUM FRAMEWORK AT A GLANCE

# Agile Teams

- Team members are cross trained to work autonomously
- Work productively on their tasks within dedicated hours
- Collaborate with other teams to work in parallel on the work product
- Create a self feedback cycle for self learning through ***Plan, Do, Check, Act, Repeat***
- Appreciate teammates and give constructive feedback
- Identify roadblocks proactively
- Go an extra mile when met with an exception/error in the product delivery
  - Google for the right keywords
  - Search for more information (Start with Why?)
  - Ask for help immediately
  - Work in collaboration
  - Be quality driven

# Stages of Team Development

- Independent behaviors by team members
- Focused on themselves
- Unclear on objectives
- Best behavior

## Forming

## Storming

- Form opinions of others on team
- Begin to challenge others who they see as not contributing

- Common purpose is clear
- Relationship has increased
- Shared responsibility
- Greater tolerance of other team members' quirks
- Norms are established

## Norming

## Performing

- Team members are self-organizing and can make decisions
- Full engagement of team members
- Embrace differences w/higher empathy
- Delivering valuable results

# Prerequisites for discussion

Project Tracker

Epic & Agile program

Supporting Documents &  
ask for front-end test data

Ask the right questions

# Documentation

- User guides
- Installation notes
- Release notes
- Troubleshooting documentation
- FAQs

# End

- Technical Architecture
- Java & J2EE
- SQL or NoSQL
- Spring Frameworks
- DevOps Tools
- All Logs and Table Logs
- Jira & Confluence
- Kibana & Postman

# Where to look for Information

- Documentation
- Jira or Bitbucket
- Swagger
- Business Case
- Release Plan
- Environments & Servers
- Website
- Journals
- Google Scholar
- Ask Architect and Manager

# Thank You!

-Questions & Answers
